EDUCATION:

• **Punjab University College of Information Technology, Lahore**
BS-IT (Information Technology)

2021 - 2025

SUMMARY:

Enthusiastic and motivated **Software Engineer** with a solid foundation in full-stack web development, android apps development and machine learning concepts. Skilled in building dynamic and responsive web applications using **MongoDB, Express.js, React.js, Next.js and Node.js**, Android Apps with **Kotlin/Java**, along with hands-on experience in **Python, and basic machine learning models**. Passionate about problem-solving, learning new technologies, and applying **AI/ML** techniques to real-world applications. Looking forward to grow as a developer, contribute to impactful projects, and collaborate with teams to deliver innovative solutions.

PROFESSIONAL EXPERIENCE:

Associate Software Engineer — Daira Engineering

April 2026 - Present

- Building **Fitness Tracking AR Glasses Android App – Minimis Flow** from scratch using **Kotlin/Java**.
- Integrating seamless design in the app using **Figma**.
- Writing Clean, Reusable Code with AI tools.
- Applied **Object-Oriented Programming (OOP)** principles in **Kotlin** to write modular and reusable code using **MVI** structure.
- Automated Object Creation using **Dagger Hilt**.
- Working with Cross platform and integrated HR sensors through **C** code/libraries.
- Integrated Google Maps and turn by turn Navigation inside the app using **Google Maps API** alongside **Navigation SDK, Places API**.
- Implemented **GPS, Android Sensors (Accelerometer, Barometer)** for seamless navigation.
- Showing Current Stats in live HUD (**Heart Rate, Pace, Distance, Speed, Cadence, Power, Elevation Gain**) during workout and Post workout Stats (**Avg Heat rate, Avg Pace, Avg Cadence, L/R Power Balance, Est. Calories**).

TECHNICAL SKILLS:

- **Languages:** JavaScript (ES6+), Kotlin, Python, Node.js, MongoDB, Mongoose, SQL, HTML, CSS.
- **Libraries / Frameworks:** React.js, Next.js, Express.js, Dagger Hilt, NumPy, Pandas, Matplotlib, Scikit-learn, Bootstrap, Tailwind CSS.
- **Tools and Platforms:** VS Code, Android Studio, Jupyter Notebook, Git and GitHub, Postman, Vercel.

OTHER PROJECTS:

- **MERN Projects:**

- **Fullstack Real-time Chat Application:**

- Build using **MERN+Socket.io+TailwindCSS+DaisyUI**, Authentication and Authorization with **JWT**, Real-time messaging with Socket.io, Online user status, Global state management with **Zustand**, Email notification using **NodeMailer**, Error handling on both server and client side.

- **Foodies:**

- Build using **MERN+NextJs+ReactBootstrap**. A dynamic and user friendly food ordering and restaurant management web application where customers can easily discover restaurants and explore its options to order food. While restaurant owners can manage their operations like profile management, menus, orders, payments through restaurant panel. The admin panel is responsible for the management of both accounts.
